- ✓ Vitamin B12 \$30
- ✓ Vitamin B Complex \$30
- ✓ Vitamin D3 \$30
- ✓ Metabolism Booster \$40
- ✓ Glutathione \$50

NAD+

NAD+, or nicotinamide adenine dinucleotide, is a critical coenzyme found in every cell in your body, and it's involved in hundreds of metabolic processes. Studies have shown NAD slows the aging process, restores neurologic function, improves mental clarity and the body's overall health. The human body naturally produces NAD, but the body doesn't have an endless supply of NAD+. Age, Alcohol, Diet, Stress, Medications, Chronic Illnesses and Drugs all contribute to declining NAD+ levels. Supplementing with NAD IV is the most effective method for increasing NAD+. Our staff calls it the game changer. Our clients call it the fountain of youth.

Benefits of NAD+ IV

- ✓ Slow or reverse the aging process
- ✓ Improve brain health and neurological function
- ✓ Improve mental clarity and focus
- ✓ Boost energy levels, reduce overall fatigue
- ✓ Restore muscle function and athletic performance
- ✓ Prevent or correct damage to DNA

NAD+
